

20v lithium battery pack to 220v power supply

Firstly you will need to set your DC power supply to continuous voltage. If it's lithium ion battery, you can count 4.15V per cell. So, if it's a 12V battery, it'll be 12.45V and so on, for your case it's 20.75V. If your DC power supply does feature a current limiter, set it to what the manufacturer tells you in the battery's data sheet.
