

## **600w outdoor mobile power solar charging test**

How much power does a oupes 600W solar panel take?

I received a maximum of 82W from the panel and it worked easily to charge the battery up. The OUPES 600W system can take in up to 100W of solar panel input power and will charge in about six hours with a 100W input. With its MPPT charge controller, it can take in over 100W of power but will not use the extra power to charge the system.

What is the best portable power station paired with a solar panel?

The OUPES 600W portable power station paired with a 100-120W solar panel is best for backup power at home, inside camper vans, and any other off-grid scenario where powering devices and small appliances are needed. Below you'll find the basic specs of the OUPES system.

What is the maximum solar input of oupes power station?

It will divert the extra energy to protect its internals. Overall, the maximum solar input of the OUPES power station is average when comparing it to the top solar generators in the 500-600Wh category. 500 to 600 watt-hour solar generators with listed maximum solar inputs.
