How many AA/AAAs can a 9v battery do?

Can do 2 9Vs, and 12 AA/AAAs. It's a beast. More to the point though, 2 Megas off a 9V battery? That'll run out of juice in like 6 hours just powering those boards, forget about whatever they're connected to.

But, because some places I was going to stay would have power, I had brought my variable 30A power supply that can set the voltage up to 16V, and I had an inline current meter. So, with great fear and trepidation, I thought I'd do a field-expedient battery charge.
