

What size screws do you need for a base station?

The screw size for a base station depends on the type of base station and the wall bracket being used. For example, the screws for the Valve Index base station are 30mm long, with a 5mm diameter and 16 threads per inch. The screws for the HTC Vive base station are M7 or M8 screws.

What size screw does a Valve Index base station use?

The specific screw used in the Valve Index base station is a #10 screw, 1.25 inches long. The screw size for the wall bracket is 30mm long and 5mm in diameter, with approximately 16 threads per inch. There are alternative methods to mount the base stations without drilling, such as using contractor poles, tripod stands, or 3M command strips.
