

What is a base battery?

The Base battery helps balance the grid through grid stability operations. This allows Base to get paid by the grid rather than by homeowners. Base customers get the full benefit of whole home backup protection from the Base battery. Are you thinking, "Too good to be true"?

How long does a base battery last?

Base offers a 20-50 kWh battery/batteries and an 11 kW inverter, making it one of the largest home backup systems on the market. Base's batteries have a longer duration and can back up more appliances in your home than almost any other home backup solution. Base batteries are designed to last up to 15 years and withstand extreme temperatures.

How many batteries does a base power company offer?

Most customers will get one battery (20-25 kWh), though some may qualify for two batteries (50 kWh). Generation sources: Base batteries can integrate with solar panels and/or generators, increasing the duration in an outage. Can I talk to someone? Certainly, you can email us at team@basepowercompany.com or call/text us at (512) 518-1009.

Where is the battery placed?

The battery is placed outside your house. We have 3 battery configurations: Wall-mounted battery (20 kWh): 58.5" tall x 27.17" wide. Ground-mounted battery (25 kWh): (1) 4' tall cube with a 3'x3' base. Two ground mounted batteries (50 kWh): (2) 4' tall cubes with 3'x3' bases, 3' apart from each other.

How much does a home battery cost?

Upfront Fee: The Base battery is a 20-kWh battery, one of the largest home batteries on the market. Comparable backup systems, including installation, cost approximately \$20K. With Base, homeowners only pay a one-time installation fee. Base installation fee is typically \$3K, but can be lower in different cities.
