Battery Law What certification

What is the EU Battery regulation?

The EU Battery Regulation encompasses a comprehensive set of rules and requirements established by the European Union (EU). On July 28,2023,the EU Commission published the new EU Battery Regulation (2023/1542) concerning batteries and waste batteries, which replaced the EU Batteries Directive (2006/66/EC) and took effect on August 17,2023.

What is the batteries regulation?

The Batteries Regulation is the first European legislation that considers the full life cycle of batteries, including sourcing, manufacturing, use, and recycling, all in a single law. This aligns with the European Green Deal's circularity goals and promotes the sustainability of batteries throughout their life cycle.

What is the EU Battery regulation 2023/1542?

In July 2023,a new EU battery regulation (Regulation 2023/1542) was approved by the EU. The aim of the regulation is to create a harmonized legislation for the sustainability and safety of batteries. The regulation started to apply on 18 February 2024. Until 18 August 2025, the regulation will coexist with the Battery Directive (2006/66/EC).

What are battery safety requirements?

These include performance and durability requirements for industrial batteries, electric vehicle (EV) batteries, and light means of transport (LMT) batteries; safety standards for stationary battery energy storage systems (SBESS); and information requirements on SOH and expected lifetime.

What types of batteries are covered by the EU Battery regulation?

The regulation applies to all categories of batteries. It shall apply to batteries that are incorporated into or added to products, or that are designed to be incorporated into or added to products. Why is the EU battery regulation important?

What types of batteries are covered by the batteries regulation?

The Batteries Regulation applies to all batteries, including portable batteries, and more specifically, portable batteries of general use.

The new EU Battery Regulation, Regulation 2023/1542, introduces significant changes and requirements aimed at enhancing the sustainability and safety of batteries and battery ...

The new Regulation entered into force on 17 August 2023, replacing the Battery Directive 2006/66/EC which will expire two years later with some exceptions. In contrast to a directive, a regulation is a legal act which applies automatically ...
