

How much does a car battery cost in the UK?

Here's what we found. The cost of a new car battery in the UK is £50 up to £290, although most car owners will pay at least £80 for a battery, with costs varying by factors like the vehicle--and batteries for newer cars with start/stop technology typically cost around 20-25% more than conventional batteries.

Why are car batteries so expensive?

Many car owners are surprised by the high cost of car batteries. Several factors contribute to their high cost. One major factor is the quality of materials used in manufacturing these batteries. High-quality materials ensure that they have a longer lifespan and are more reliable than cheaper alternatives.

Where can I buy a car battery?

At Halfords, we're with you for the journey. Get a car battery check, buy a replacement car battery and have it fitted at Halfords or at home. Buy online or in-store!

Do I need to buy a car battery?

A trained technician will assess the health of your car's battery, and advise on whether it's good to go or in need of replacement. There's no obligation to buy either. You can find our entire range of car batteries and car battery charging accessories online.

Should I pay for a new car battery?

Yes, when you pay for a new car battery, you'll also need to pay for the mechanic's skills and time. However, labour costs are usually included in the overall garage quote. So, you shouldn't be hit with an extra fee after the job. If in doubt, check with your mechanic first.

Should you sell your car battery?

However, the reality is, a poorly maintained or faulty battery can negatively impact your car's performance way before that stage. A flat or faulty battery can cause your car to fail its MOT and reduce its market value. Therefore, your car battery shouldn't be an afterthought, especially if you're wondering if you should sell your car.
