

What is a battery assembly solution?

The comprehensive Battery Assembly solution can be equipped with an array of options, including unpacking, waste disposal, electrical testing, enclosure and casing assembly, PCB assembly, laser welding and final-product testing. Plus the solution's compartmentalized design ensures high-grade fire safety to keep its processes and surroundings safe.

Why should you choose a battery module production line?

Fast assembly, spatial orientation, with quality control and battery cell testing throughout the assembly phase, ensures this battery module production line achieves high throughput with a very low failure rate. Turn your ideas into reality - get in touch today.

Who is battery technology source?

Battery Technology Source (BTS) is a specialized supplier of lead-acid battery manufacturing equipment. With more than 30 years of worldwide experience, among our partners are some of the largest manufacturers of motorcycle, automotive and industrial batteries. SERVICE INFO. &#169; 2023 Battery Technology Source Co. Ltd. (BTS) All rights reserved.

Who is Ake technologies?

AKE technologies represents the system partner in the field of assembly of e-mobility components for its customers. We offer our customers experience in the development and manufacture of assembly-testing lines for complete battery systems in various degrees of automation, from the prototype line to fully automated series production.

What is a JOT battery assembly solution?

The JOT battery assembly solution is made for high-grade battery assembly for electric vehicle, energy storage and other battery manufacturers. Tailor-made, in fact, per your exact requirements. The beauty of every JOT solution is that your assembly line needs to come first. We know you need speed and accuracy across your entire production line.

How are EV batteries made?

EV batteries are made up of battery modules, which in turn are made up from a case in which battery cells are inserted and then connected on busbars or wires. Our client required a machine which could test assemble cells of type 21700 and 81650 into modules of various geometries, with up to 400 cells in a module.

Pouch cells are a popular choice for battery manufacturers. That's because the cell is highly efficient--achieving 90-95% packaging efficiency, one of the highest among ...

JOT Automation's industry-leading Battery Assembly solution is a fully complete, turnkey solution that is also suited for EV battery assembly s highlights include automated unpacking of ...

The Module and Pack assembly line is the first of UKBIC's innovative battery manufacturing equipment - sourced and supplied from leading manufacturers across the globe ...

This production line is suitable for over 90% of cylindrical products in the market, with a high degree of standardization. Main processes include manual feeding, OCV sorting and scanning, ...

JOT Automation's industry-leading battery assembly solution is a fully complete, turnkey solution for battery assembly that is also EV battery compatible. Highlights include automated unpacking of incoming material, testing, welding ...

Quality and reliability are crucial, which is where battery testing comes into play. In this blog, we look into how battery testing affects the quality standard in EV manufacturing, ...

With more than 110 EV battery assembly and test lines designed, ... ATS Helps a Leading Auto Manufacturer Redefine EV Battery Assembly. ... Avoid assembly line delivery delays by setting clear requirements, managing change requests, ...

Here, we examine how assembly and test automation help lithium-ion battery manufacturers scale new and existing technologies for precision assembly. EV Battery ...

AKE technologies represents the system partner in the field of assembly of e-mobility components for its customers. We offer our customers experience in the development and manufacture of assembly-testing lines for complete battery ...

Choose an assembly line that conducts comprehensive EOL tests, validating the functionality, safety, and performance of each battery pack before it leaves the production ...

As a single provider for the whole battery production system, our offer includes dedicated solutions for: Battery cell testing and formation; Battery module assembly; Battery pack assembly; Stationary storage pack assembly; End of ...
