

What are battery charging cabinets?

Battery charging cabinets are a type of safety cabinet that's designed especially for lithium-ion batteries. Over the recent years, as the prevalence of lithium-ion batteries has grown in workplaces, battery cabinets have become more popular due to the many risk control measures that they provide.

How does the batteryguard cabinet work?

The Batteryguard cabinet is also safe and easy to use for new personnel. It's simple: when you need to charge up your battery, you just open the cabinet and place the battery on the charger. Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery.

What is a lithium battery charging fire safe?

Phoenix Lithium Battery Charging fire safes offer this proven environment to improve safety in the workplace. Lithium Battery Charging and Storage Cabinets are designed to safely charge and secure lithium-ion batteries by offering an auto closing door, ventilation ducts to reduce heat and fire tested to EN14470-1. For use indoors only.

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large or small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

Why do I need to close the cabinet doors if a battery catches fire?

Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery. It is important that you always close the cabinet doors, because if a battery catches fire, that fire is kept inside.

How many batteries can a batteryguard safe hold?

We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries. Batteryguard is based on a fire-resistant design, so that our safe satisfies the strictest standards and guidelines.
