

Battery price inquiry table of the Ministry of Industry and Information Technology

Should lithium-ion battery companies reduce production costs?

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to expand production capacity. Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs.

What will China's new lithium-ion battery regulation mean for the battery industry?

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end battery cells and accelerate the structural adjustment of the country's booming lithium-ion battery sector.

What will China's Lithium-ion battery production capacity be in 2025?

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery production capacity will likely exceed 3,000GWh. However, the capacity utilization rate of the country's lithium-ion battery industry dropped to about 40 percent last year and is likely to reach 35 percent by 2025.

How to stabilize China's Lithium-ion battery supply chain?

2. Greater regulatory oversight to stabilize China's battery supply chain At a glance: The Ministry of Industry and Information Technology (MIIT) and State Administration for Market Regulation (SAMR) released a notice to reduce imbalances between supply and demand in China's lithium-ion battery sector.

Will rising battery prices stymie demand for EVs?

Batteries account for around 40 percent of an EV's value and rising battery prices (caused by high lithium prices, which tripled in 2022) could trickle down to consumers and stymie demand.

Electronic Information Division of MIIT (Ministry of Industry and Information Technology) issued the Lithium-ion Battery Industry Standard Conditions (2021) (draft) and Administrative ...

Second-order materials link, January-June national production of lithium carbonate and lithium hydroxide were 298,000 tons and 175,000 tons, respectively, and the ...

Today, the Ministry of Industry and Information Technology released a list of enterprises in line with the "New Energy vehicle waste Power Storage Battery Comprehensive Utilization Industry ...

On August 16, China's Ministry of Industry and Information Technology (MIIT) released the first half of 2024 the operation of the national lithium-ion battery industry. In the ...

Battery price inquiry table of the Ministry of Industry and Information Technology

CTECHi GROUP has focused on the battery industry for 14 years, offering specialized product customization services for different users. CTECHi GROUP??????14?,????? ...

The Ministry of Industry, Science, Technology & Innovation has a mission to develop the industry and micro and small and medium enterprises (MSME), promote entrepreneurship and ensure ...

Mr. Shan Zhongde, vice minister of industry and information technology. Mr. Zhao Zhiguo, spokesperson and chief engineer of the Ministry of Industry and Information ...

It is applicable to the lithium-ion battery industry within the territory of the People's Republic of China. ... Translation Store. My Library. Favorites. Share. Regulatory. In Force. Announcement ...

China's Ministry of Industry and Information Technology on Wednesday issued new guidelines for its lithium-ion battery industry, aiming to transform, upgrade and promote ...

Workers make lithium battery products at an industrial park in Nantong, East China's Jiangsu Province, on December 11, 2023. Photo:VCG. China's Ministry of Industry and ...

The Ministry of Industry and Information Technology (MIIT) is the sixth-ranked executive department of the State Council of the People's Republic of China is responsible for ...
