

## **Bogota thousands of dollars new energy battery**

Will electric buses be delivered to Bogota in 2021?

The electric buses, which will be manufactured by the Chinese automakers BYD and are expected to be delivered to Bogot&#225;; between the end of 2021 and early 2022, will be charged with clean energy, coming from 100% renewable sources at the electroterminals built by Enel X.

Will Enel X contribute to Bogota's decarbonization plan?

This award, which follows the contract signed at the end of 2019 with SITP for the construction of four electro-terminals that is currently ongoing, will bring to around 900 the number of e-buses served by Enel X in Bogot&#225;;, making the company a key partner of SITP in contributing to the city's decarbonization plan.

How many e-bus chargers are there in Bogota?

The two electroterminals, which are expected to be operational between November 2021 and April 2022, will be built in two different areas of Bogot&#224;; (Usme and Fontibon) and will include approximately 200 e-bus chargers.

Who owns 401 E-buses for Bogota (Colombia)?

401 recently awarded battery-electric buses for Bogota (Colombia) will be again owned by Enel X and rented to bus operators, in the framework of a business model which is gaining ground in Latin America (starting with Santiago de Chile). Enel X will also build two new electritherminals to host the e-buses. This award follows Enel [...]

Based on recent trends, battery costs are expected to drop 17 % (Fries et al., 2017, Jadun et al., 2017, Lutsey and Nicholas, 2019). According to a Bloomberg New Energy ...
