

The invention provides a capacitor rubber plug based on high stability, which comprises the following components in parts by mass: 70-90 parts of ethylene propylene diene monomer, 50-75 parts of polyester plasticizer, 0.3-0.8 part of heat stabilizer, 10-15 parts of chopped glass fiber and 5-25 parts of hot melt resin. The rubber plug has effective sealing performance, and the ...

The utility model relates to a reverse osmosis pure water technical field discloses a condenser rubber buffer reverse osmosis pure water manufacture equipment, which comprises a working platform, work platform's top rigid coupling has the water pump, the both ends of water pump all communicate has the water service pipe, when the waste water of condenser rubber buffer ...

The utility model provides a rubber plug for a capacitor with good heat dissipation performance, and belongs to the technical field of rubber plugs. The capacitor solves the problems that when the existing capacitor is inclined or bent under other influences, the lead is easy to bend and abrade and even damage the lead, so that the service life of the capacitor is influenced.

Rubber sealing plug, used for aluminum electrolytic capacitors, as electronic industry supporting production enterprises, began to build the factory in 1985, has been more than 30 years of professional production of rubber plug experience, ...

The purpose of this utility model can be realized by the following technical scheme: a kind of capacitor rubber plug, including rubber plug main body, The fairlead passed through for...

capacitor lead wire buffer body Prior art date 2020-04-30 Legal status (The legal ...

The invention belongs to the technical field of rubber sealing plugs, and particularly relates to a method for producing a rubber sealing plug composition for an ...

The invention provides a capacitor rubber plug installation system which comprises a plug discharging plate connected with an external vibration tray, wherein a conveying rail is arranged above the plug discharging plate, one end of the conveying rail extends to the upper part of a rotary table, a plurality of capacitor main body stations are uniformly distributed on the surface ...

The utility model discloses a sealing rubber stopper for an electrolytic capacitor, two end faces of the rubber stopper body are respectively provided with 5-9 concentric circles grains concentric with the stopper body,

and the diameter of the stopper body is 6-10 mm. The sealing rubber stopper has reasonable structure, can effectively ensure the product quality of the capacitor, ...

The utility model provides an aluminum electrolytic capacitor rubber plug, belonging to the capacitor. It has solved the current capacitor interior capacitance liquid and has passed through the faster problem of sealing member volatilization speed. This aluminium electrolytic capacitor rubber buffer, including the rubber buffer main part, set up the pin hole that supplies the pin ...

The invention provides six-axis robot automatic production equipment for a capacitor rubber plug, and belongs to the technical field of automatic production of capacitor rubber...
