

Could the Congo become an electricity exporter?

Almost all electricity generation today comes from hydropower and the Inga project has the potential to provide much more. If network constraints are addressed, Democratic Republic of the Congo could become an electricity exporter.

Why is the Democratic Republic of the Congo a CC BY 4.0?

Licence: CC BY 4.0 In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

Could a mega-dam be built on the Congo River?

Dam plan busted? World's biggest hydropower project in the balance From a set of roaring rapids, comes a grand vision. There are plans to build a magnificent, multi-billion dollar mega-dam on the Congo River - one that would produce enough renewable electricity to power vast areas of Africa. The structure would be called the Grand Inga Dam.

What does 3% energy transfer mean for DRC?

3% ENERGY TRANSITION IN ACTION Grand Inga hydropower project The DRC has vast solar, wind and hydropower potential, and the government committed to increasing the share of renewable energy in the national energy mix as part of its nationally determined contributions (NDCs) under the Paris Agreement. In 2013, the government announced plans to deve

What are the environmental and social impacts of the DR Congo dam?

But despite its potential, there are deep concerns about the project's environmental and social impact. A common criticism is that the dam will benefit South African consumers and DR Congo's mining companies, but not the Congolese people. Some 80% of the population lack access to electricity.

Can DR Congo have an interconnected electricity grid?

Attempts to solve this problem date back decades. In the early 2000s DR Congo and its neighbours - South Africa, Angola, Namibia and Botswana - dreamt up an interconnected electricity grid. They looked to the vast Congo River, realising that its powerful waters have an immense hydropower potential.

The Democratic Republic of Congo has huge hydropower potential while also dealing with extreme energy poverty. Foreign investors are currently partially lifting constraints on the country's hydropower capacity, which is bringing down the costs of pow
