

Fully automatic energy storage vehicle after-sales service

Why is after-sales service and vehicle maintenance important?

Please visit our privacy statement. The after-sales service and vehicle maintenance will only become more critical as vehicles become increasingly electrified and autonomous. These vehicle technologies create new challenges and concerns for service technicians as they repair and maintain customers' vehicles.

Are tyres the future of EVs?

The increasingly connected technology in EVs presents a good opportunity for online maintenance scheduling and automated service reminders. Additionally, tyres represent an excellent opportunity for aftersales revenue in the EV future. That's because: And add-on services will become crucial for aftersales department success.

Will ICE and EV vehicles be included in the aftersales network?

Evolving aftersales networks will include both ICE and EV vehicles for the foreseeable future. Although EV market share will continue to grow, service revenue opportunities from ICE vehicles on the road will remain strong for years to come.

How will technology affect vehicle servicing and maintenance?

These vehicle technologies create new challenges and concerns for service technicians as they repair and maintain customers' vehicles. The growing electrification and automation of vehicles will have extensive effects on vehicle servicing and maintenance.

Should EV retailers be the default service provider?

One such opportunity is, with EVs in Europe more likely to be bought on lease or through a Salary Sacrifice Scheme (where payments for vehicles, servicing and insurance are bundled together), retailers can seize the opportunity to become the default service provider at the time of purchase to create guaranteed regular revenue streams.

How does after-sales service work?

The after-sales service station returns the warranty parts claimed by the customer to the company warehouse every month, and the company's after-sales service department will recycle and appraise the warranty parts, and refurbish, rework and reuse the parts that can be recycled again. For those that cannot be reused, discard them.

The after-sales department of new energy vehicles takes the lead in the self-built service network of Sanden manufacturers to provide warranty services and paid services for the products sold.

It provides a history of work done on each vehicle and makes it possible to monitor vehicles. Statistics can also be obtained in a straightforward way and measures for prevention and continuous improvement can be
