

What is the Global Battery Alliance?

The Global Battery Alliance is a global collaboration platform and public-private partnership hosted by the World Economic Forum in Geneva, Switzerland. It seeks to catalyse, connect and scale-up efforts to ensure that the battery value chain is socially responsible, environmentally and economically sustainable and innovative.

What is GBA Global Battery Alliance?

learn about GBA Global Battery Alliance members collaborate on key initiatives related to ensuring a sustainable and responsible battery value chain, through the formation of Action Partnerships.

What is the Battery Alliance?

It seeks to catalyse, connect and scale-up efforts to ensure that the battery value chain is socially responsible, environmentally and economically sustainable and innovative. In 2019 the Alliance seeks to move from building and catalysing partnerships to implementation and delivery.

How can the GBA achieve a sustainable battery value chain?

The GBA hosts several initiatives to achieve its vision of a sustainable battery value chain by 2030, including: Critical Materials: to ensure critical materials are sourced, processed, manufactured and recycled in a manner that minimizes environmental impacts, protects human rights and creates benefits for stakeholders along the value chain.

Why do we need a global perspective on EV batteries?

countries, from throughout the EVB value chain. Addresses the need for an integrated and detailed global perspective to support a more circular identifies concerns and delivers recommendations The rising demand for EV batteries requires urgent action to reduce reliance on virgin materials, mitigate environmental and standardized, interoperable

What is a battery passport?

The Battery Passport will provide trusted information on indicators related to responsible and sustainable practices, resulting in a 'quality seal' capturing authenticated records of the responsible sourcing, management, recycling and use of a battery across its full lifecycle. [Learn more](#)

The UK Foreign Secretary, David Lammy, has released a pivotal report showcasing Africa's potential to become a key player in the global battery supply chain.. Unveiled at a growth and renewable energy reception in ...

1 ?· KILNTECK's business model combines technological innovation with environmental responsibility, serving battery-active material producers worldwide through an ethical closed-loop approach. Battery Technology. KILNTECK's technological portfolio centers on thermal processing systems essential for

battery material production.

Global Battery Metals Completes Detailed Remote Sensing and Structural Study of Knockeen Dike Swarm and Regional Leinster Lithium Project Area Sep 21, 2023 Global Battery Metals Announces Results of Annual Meeting of Shareholders Sep 12, 2023 Global Battery Metals Engages Resource Stock Digest for Marketing Contract ...

In 2017, BASF co-founded the Global Battery Alliance (GBA) - a multi-stakeholder alliance that includes, major international companies from the automotive, technology, chemical and mining ...

The Battery Network is an Organization bringing battery researcher from all over the World together in one Global Battery Network.

The Global Battery Alliance (GBA) today successfully unveiled the results of the 2024 Battery Passport pilots during the Annual General Meeting, hosted in Shanghai and Ningde. Ten consortia, led by the world's leading battery cell manufacturers, successfully completed the largest pre-competitive effort to establish harmonized battery passport.

Los Angeles, 10 July 2024 -- MOBI, a global nonprofit Web3 consortium, is thrilled to announce a significant milestone in development of the Web3 Global Battery Passport (GBP) Minimum Viable Product (MVP). In a historic first, the MVP has successfully demonstrated battery identity/data validation and exchange between nine organizations using open-standards -- MOBI Battery ...
