

Access to public lighting is an important element of international development and LED public lighting provides additional benefits beyond those typically provided by traditional forms of lighting. Its electricity consumption is 40 to 60 percent lower, and the quality of light is generally perceived as better. As a result, ESMAP is providing resources to help clients implement LED programs.

The Role of Smart Public Lighting in Smart Cities. Public lighting accounts for an average of one-quarter of a city's energy consumption. With the advent of intelligent solar lighting solutions, cities can improve their ...
