## Household battery charging station installation requirements

Should EV charging stations be installed at home?

For a growing number of EV owners, having an EV charging station installed at home makes far more sense. But that's sometimes easier said than done. For example, one third of UK homes don't have a driveway, and that number is nearly two-thirds in towns and cities.

Do you need an EV charging point if you're building a new home?

Regulations introduced in 2022 mean if you're building a new home, you're now required install an EV charging point - even if you don't own an electric vehicle. From costs to the requirements, here's what you need to know

Do I need planning permission to install an EV charger?

Therefore it is important to review your lease and consult with your landlord before scheduling the installation of an EV charger at a leasehold property, you may be obliged to do so under the terms of your lease. In most cases, you do not need planning permission to install an electric vehicle (EV) charger at your home.

How much does it cost to install an EV charger?

However, some vehicles have a maximum charging rate of 3.6kW, so there's no real need to have a faster charger unless you're planning to switch your EV in future. Home installation costs between £500 - 1,000. But that really depends on how much work needs to be done to make your place suitable for an EV charger.

How do I install a home charger?

Most home chargers are operated through an app (so the charger will require an internet connection to work). You will need off-street parking or your own parking space if you live in a flat (within a reasonable distance of your fuse box). You will need to own your home or have permission from your landlord before you can install the charger.

Can an EV charger be installed in a modern house?

Even if you live in a modern house, your house's power supply may not be suitableto install an EV charger. So, an electrician might need to spend time assessing the situation and potentially making adjustments to your power setup, including replacing your fuse box.
