

# How to repair one of the battery packs if it is broken

Should a battery pack be replaced?

If a relatively new pack has only one defective cell and a replacement is located, exchanging the affected cell makes sense. With an aged battery, however, it's best to replace all cells. Mixing new with old causes a cell mismatch that has a short life. In a well-matched battery pack all cells have similar capacities.

Can a battery pack be rebuilt?

Get your battery pack rebuilt with County Battery Services pack rebuilding service. Whether it is Ni-Cd, Ni-Mh or Lithium, we can repair and improve your battery packs to an upgraded standard by exchanging your internal cells to brand new quality battery cells of the same or higher capacity.

Each refurbished or recycled pack comes with a 1-year warranty and is rebuilt to high standards. Easy to order online:

Can a battery shop reuse a failed battery pack?

A battery shop may salvage good cells from a failed pack for reuse but the recovered cell should be checked for capacity, internal resistance and self-discharge - the three key health indicators of a battery.

Can a battery be repaired?

Batteries for power tools and other commercial devices can often be repaired by replacing one or all cells. Finding a NiCd and NiMH cell is relatively easy; locating an appropriate Li-ion cell is more difficult.
