

## How to replace the solar power supply head video

How do I connect my solar panels to my inverter?

The solar panels are connected to the inverter using four MC4 connectors. These are the black plugs and sockets to the left on the underside of the inverter. Click the video to the right to show this process. Remove the connectors by pinching the prongs and withdrawing the plugs.

Can I replace a power one PVI 3.6 inverter with a Solis model?

On this page we will show you the electrical work involved in replacing a Power One PVI 3.0 or 3.6 inverter with a Solis model supplied by us. By following these instructions a competent DIYer with basic tools will be able to replace their Power One inverter.

How to replace a power one inverter?

By following these instructions a competent DIYer with basic tools will be able to replace their Power One inverter. You're going to need some good quality insulated electricians screwdrivers, an insulated wire cutter/stripper, a combi drill and the appropriate fixings for the type of wall the inverter is fixed to.

How do I install a new Solis inverter?

Your Solis inverter includes an a.c. connector which will need to be put onto the free end of the a.c. cable. This is in a plastic bag underneath the new inverter. The wires coming from the a.c. cable are probably too long to fit within the new connector. We recommend shortening them to approximately 30mm each.
