

Are solar panels safe?

With the increasing popularity of renewable energy, solar panels have emerged as a viable and sustainable option for power generation. However, misconceptions and myths surrounding the dangers of solar panels often raise concerns about their safety. In this article, we will dive into the topic and address common myths associated with solar panels.

Is it safe to install solar panels on your roof?

Let us be the first to tell you that this is not true. For the vast majority of homeowners, installing solar panels is a simple process that doesn't wreak havoc on your roof. Thanks to the skills of professional solar installers and increasingly advanced mounting materials, solar panels can now be safely added to virtually any type of roof.

Are there myths about solar panels?

Homeowners are installing solar panels in increasing numbers and reaping the financial and environmental benefits. But some are still hesitant because of myths around cost, performance and durability of panels. Here, we debunk the most common myths so that you have all the facts you need before you pivot to panels.

Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

Is it safe to walk on solar panels?

Although solar panels are designed to withstand the weight, it is generally not considered safe or recommended to do so. There are various factors that could potentially cause damage to the panels or the overall PV system. Therefore, please avoid walking on solar panels to minimize the risk of any potential harm or damage.

Why should we not use solar energy?

In fact, it's one of the more incorrect arguments people use to justify why we shouldn't use solar energy. Like anything else, solar panels need to be disposed of properly when their time of usefulness is over. You wouldn't toss your old tires out on the road, and the same goes for your old solar panels.

The primary reason solar panels are good for the environment is down to their carbon-busting technology. In fact, the average residential solar panel system in the UK saves 0.7 tonnes of carbon dioxide each year. So, ...
