

# Lithium Battery Transportation Training Materials

What training courses are available for shipping lithium batteries?

Large Lithium Batteries Here are the training courses for Shipping Lithium Battery Dangerous Goods. Section I and Section II. UN3091, UN3090, UN3481 and UN3480. Held nationally in the UK and our courses include Lithium Batteries by Sea (IMDG), Air (IATA) (ICAO) and Road (ADR).

Do you offer training for lithium batteries?

If you only ship Lithium Batteries, we offer specific training for Lithium Batteries by Air (IATA), Road (ADR) and Sea (IMDG). Depending on the power of your batteries, there are two options for training; these are referred to as Large Lithium Batteries and Small Lithium Batteries.

What is a lithium batteries course?

This lithium batteries course is intended as initial or recurrent training for participants involved with the handling, shipping, and/or transport of Lithium Batteries by air.

What is a lithium cell & battery transport course?

As a result the transport regulations are constantly changing, this course will enable students to have a thorough understanding of the relevant regulations. This course covers the requirements for transporting all types of Lithium Cells and Batteries including packed with and contained in equipment by Air.

What type of batteries should I use for training?

Depending on the power of your batteries, there are two options for training; these are referred to as Large Lithium Batteries and Small Lithium Batteries. Large Lithium Batteries - Lithium Ion Batteries with a watt-hour rating of over 100Wh or Lithium Ion Cell with a watt-hour rating of over 20Wh

Does hazmat University offer lithium batteries training courses?

Hazmat University offers a flexible series of initial or recurrent modal and multimodal Lithium Batteries Training courses which provide the following benefits: Course content specifically focused on the requirements for transporting lithium batteries provides training cost and time efficiency by addressing only relevant requirements.

Lithium Batteries. CUSTOMER : This session is for anyone who ships lithium ion batteries or lithium metal batteries OBJECTIVE: The participant will be able to meet the requirements of different regulations for the transportation of dangerous goods to ship lithium batteries/batteries according to the requirements in force for all modes of transport (Air, Sea, Road and Rail).

The provisions of the DGR with respect to lithium batteries may also be found in the IATA lithium Battery Shipping Guidelines (LBSG) 8. th. Edition. In addition to the content from the DGR, the LBSG also has

# Lithium Battery Transportation Training Materials

additional classification flowcharts and detailed packing and documentation examples for lithium batteries.

Instead, we will adopt the provisions outlined in the UN Model Regulations, the ICAO Technical Instructions and the IMDG Code that permit the transport of up to 8 lithium ...

Learn about IATA accredited Training in Lithium Battery Transportation to meet safety and compliance within UK regulations. ... Discover How DG Online Training is Transforming Industry Standards When it comes to ...

Transportation Lithium ion batteries with a nominal capacity exceeding 100 Wh and lithium metal batteries containing over 2g of lithium are classed as dangerous goods (Class 9), as such there are strict requirements for transporting them via road, air, sea and rail. ... specific signage and additional training for employees and others; and ...

Here are the training courses for Shipping Lithium Battery Dangerous Goods. Section I and Section II. UN3091, UN3090, UN3481 and UN3480. Held nationally in the UK and our courses include Lithium Batteries by Sea (IMDG), Air (IATA) (ICAO) and Road (ADR).

Battery transport bags: Use specially designed battery transport bags equipped with fire-retardant materials and secure closures to transport individual batteries or small battery packs safely. Collaboration and industry ...

Here's what you need to know if you're sending Lithium Batteries by road or rail. **LITHIUM BATTERIES** Road & Rail Transport Fact Sheet Lithium-Ion Batteries Lithium-ion batteries are a rechargeable (secondary) battery, where the lithium is present in an ionic form in the electrolyte. Lithium polymer batteries are also included in this category.

The complex world of lithium battery transport regulations ... non-conductive and has sufficient absorbent material. Large format lithium battery packaging is often custom-designed and needs to follow a complex ...

Transport of Lithium Batteries - Intermodal - An increasingly popular training course, this training is essential for those organisations that consign or transport lithium batteries.

o Lithium-ion batteries power essential devices across many sectors, but they come with significant safety risks. o Risks increase during transport, handling, use, charging and storage. o Potential hazards include fire, explosion, and toxic gas releases. o Compliance with safety best practices is essential to minimise risks. o We will provide actionable recommendations to ...
