What are Japan's new battery energy storage regulations?

The government is also reforming its battery energy storage system (BESS) regulations, with batteries set to play an important role in maximizing renewable energy supply and avoiding grid constraints. We look at the changes being implemented and what they mean for renewable energy projects in Japan.

Will there be further subsidy rounds for stand-alone Bess in 2022?

Market participants have been surprised by the short-lived nature of this scheme, particularly given the recent launch of the FIP scheme in April 2022 and the Amended EBA enacted on 20 May 2022: the market will need to wait and see whether further subsidy rounds will be provided to promote further investment in Stand-alone BESS in the near future.

How has government subsidy impacted battery storage?

The government's subsidy push has so far prompted an increasing number of private companies to invest in battery storage projects, including large-scale plants. With countries around the world pushing to accelerate their renewable deployments, it is more important than ever to maximize solar electricity generation.

Will a Bess be covered by a subsidy programme in 2022?

The initial subsidy programme to cover the construction costs of Stand-alone BESS was open to applicants from 16 February 2022 to 11 March 2022. To be eligible, a BESS must be a Stand-alone BESS with a minimum output capacity of 1,000 kW.

Will battery storage reduce the cost of a power grid upgrade?

OCCTO estimates that the annual cost of integrating more renewable generation into the power grid could reach \$353 billion in 2050 and the rate of curtailment could reach 52% if the transmission network is not upgraded. Installing battery storage would reduce the cost of upgrading the grid and avoid wasting clean generation.

In 2020-2021, in response to the COVID 19 pandemic, France has committed at least USD 71.29 billion to supporting different energy types through new or amended policies, according to ...

5 ???; A total of 27 projects was awarded 34.6 billion yen in subsidies through METI's FY2024 program for supporting the expansion of renewable energy through introduction of energy ...

In the last month, details of at least two subsidy schemes which relate to battery storage have been announced by the Government. This includes the 2023 BESS subsidy ...

In 2020-2021, in response to the COVID 19 pandemic, Saudi Arabia has committed at least USD 6.50 billion
