

How much solar power will MENA have by 2023?

Global solar power capacity increased by more than 25 times in this decade, from almost 23 GW at the beginning of 2010 to 617.9 GW anticipated by the end of 2020. Overall investment in the MENA energy sector could reach \$1 trillion by 2023, with the power sector accounting for the largest share of the spending at 36%.

Will the United Arab Emirates install more solar panels a year?

Until this month, the oil-rich United Arab Emirates had modest ambitions when it came to renewable energy: to install roughly as many solar panels each year as the UK. But then Masdar, the country's state-owned renewable energy company, decided to make a splash at a huge trade fair in Abu Dhabi.

How much money will the MENA energy sector invest in 2023?

Overall investment in the MENA energy sector could reach \$1 trillion by 2023, with the power sector accounting for the largest share of the spending at 36%. As the unit rate for solar energy investment is reducing year-on-year, a decrease in capital does not represent a slowdown in the industry (Figure 2).

Will solar power prices reach grid parity?

This trend will continue to increase as solar power prices reach grid parity. In 2019, the global estimated additions of solar photovoltaic (PV) reached almost 138 GW (Figure 1). Within the Middle East and North Africa (MENA) region, the increased industrial activity and drive towards renewables is reflected in each country's strategy.

Why is Dubai's 900 MW solar tender so low-price?

Most recently, Dubai's 900 MW solar tender hit another low-price record with \$0.0169 per kWh. The continuous drop in costs for solar panels is one of the factors that have contributed to reducing CAPEX of utility-scale projects.

Which solar projects will be completed in Ma'an in 2020?

Round 3 projects consisting of 150 MW of solar and 50 MW of wind power, including a storage option, are being carried out in Ma'an and are planned to be completed in 2020. Baynouna Project is the largest single solar energy project developed under the PPA scheme with 200 MW. It is expected to be fully operational in the first quarter of 2020.

Energy Transition - Middle East's largest oil, gas & energy news portal, which delivers latest news, trends, data, analysis & opinion for the region's energy professionals ...

These solar power projects showcase the Middle East's technological advancements and commitment to a sustainable future. The Top 10 Solar Power Plants in the Middle East. ANALYSIS, Exploration & Production, ...

Middle East set to dominate solar energy with over 100 GW capacity by 2030, leading the way towards a renewable-powered future. The Middle East is projected to surpass 100 GW of solar capacity by 2030, with renewable energy sources expected to account for 70% of the region's power generation mix by 2050, up from only 5% in 2023.

Huasun in Saudi Arabia: Chinese heterojunction (HJT) solar PV manufacturer Huasun Energy presented its latest solar products at the recently concluded Solar and Storage Live KSA 2024 in Riyadh. The G12 and G12R high-efficiency modules suit the harsh desert climate of the Middle East, according to Huasun.

The Kuwait Authority for Partnership Projects (KAPP) has shortlisted several consortiums led by top global utility project developers for the Al Dibdibah Power and Al Shagaya Renewable Energy (Phase III) Zone 1 ...

Land allotment for new RE projects: The Emirates Water and Electricity Company (EWEC) has secured approval to allocate 4 new sites in Abu Dhabi covering close to 75 sq. kms. of land for the development of new solar PV and wind energy projects. These sites in Al Faya, Al Khazna and Al Zarraf will host 4.5 GW AC of additional solar PV capacity, and the one in Sila ...

Kardemir, one of Turkey's leading steel producers, has updated its pricing for steel sections. The company now offers IPE-NPU sections at USD 680-875 per ton...

Solar capacity in the region rose 23 percent in 2023 to 32 gigawatts (GW) and is projected to exceed the 180 GW peak by 2030. The latest Solar Outlook Report 2025 by the ...

Middle East's Renewable Energy Capacity Reaches 9.3 GW By 2023 With Surge In Solar And Wind Projects - Report

According to the Middle East Solar Industry Association (MESIA)'s 2024 Solar Outlook Report, the Middle East and North Africa (MENA) region is expected to reach 40 GW ...
