

# New Energy Battery Code Registration Query

Do I need to register a new battery?

Depending on the make of car and the functionality of the respective system (open or closed), modern vehicles with Battery Energy Management (BEM) may or may not require or recommend that the new battery be registered.

How do I Register energy devices?

Guidance for device owners and installers on how to register energy devices, including heat pumps and electric vehicle charge points. You must register the following energy devices with your local Distribution Network Operator: This document tells you what your responsibilities are and when you need to notify the Distribution Network Operator.

Who performs battery registration?

Battery registration is typically performed by a dealership. Battery registration requires a scan tool (or related OBD-II device) that can communicate with and perform battery registration on the specific vehicle. Different vehicles require different user inputs/battery information and specific scan software.

Do I need a BEM code for a new start-stop battery?

Depending on the diagnostic tool being used, some require a BEM code when changing the battery. In this case, it may be necessary to enter both lines for the BEM code of the new start-stop battery. Other diagnostic tools generate the required battery-specific information themselves. In this case, it may not be necessary to enter the BEM code.

How do I register a BBST after a battery replacement?

After the battery has been replaced, the Memory Saver can be removed. Now finally connect the BBST to the OBD interface. Switch on the BBST and follow the instructions on the display. The battery is now registered in the vehicle. This process is completed within a few minutes.

Do I need to register a new start-stop battery?

There are currently 4 systems on the market to “teach” the new start-stop battery. As already mentioned, depending on the make of car and the functionality of the respective system (open or closed), modern vehicles with Battery Energy Management (BEM) may or may not require or recommend that the new battery be registered. 1.

When a new battery is installed, battery registration essentially resets the charging parameters to account for a perfectly functional battery once again. Why battery registration is necessary Cars today have more technology ...
