

What is a solar type roof?

This design not only maximizes energy efficiency but also enhances the overall aesthetic appeal of a property. Unlike traditional solar panel installations that sit on top of existing roofs, solar type roof designs incorporate solar technology directly into the roofing material itself.

What types of solar panels are available for pitched roofing?

As always, the team at AccuRoof are here to help. There are two main types of solar PV systems available for pitched roofing; in-roof (commonly used for new build projects) and on-roof (commonly a retrofit product). In roof solar PV, also called 'roof-integrated solar' the solar arrays are installed flush with the roof finish.

What is on-roof solar roofing?

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics.

What is the installation process for a solar type roof?

The installation process for a solar type roof design varies depending on the specific system chosen. However, the general steps include: Site Assessment: A qualified installer will assess your roof's suitability for solar installation, considering factors such as slope, orientation, and shading.

How do solar PV systems work on a flat roof?

Solar PV systems for flat roofs can be divided into two types: Flat roof mounted solar PV systems can be mounted on the roof structure via fixings which penetrate the waterproofing. The PV array is installed onto a rail system with hard point fixings into the structure, through the waterproofing layer.

What is a roof solar PV system?

In roof solar PV, also called 'roof-integrated solar' the solar arrays are installed flush with the roof finish. Installed before the roof covering is applied, in-roof systems are suitable for new builds, but can be installed on an existing roof as part of a re-roofing project.

Unlike traditional solar panel installations that sit on top of existing roofs, solar type roof designs incorporate solar technology directly into the roofing material itself. This ...
