

# Requirements for using warehouse batteries

What is a lithium battery storage guideline?

It is a guideline that outlines safe storage practices, including the charging and discharging of lithium-ion batteries, lithium metal batteries, and hybrid lithium batteries. If you would like to learn more about shipping of lithium batteries, we wrote this guide about just that.

How do you store a lithium ion battery?

In general lithium-ion batteries should always be removed from the devices they power and stored at 60-70% of the pack's capacity. If a battery will go unused for three more days, it should be stored in a cabinet or larger store. Once disconnected, storing lithium-ion batteries follows similar principles as the correct storage of chemicals.

Are lithium-ion batteries safe to store?

Lithium-ion battery fires can even reignite after being contained. In this post, we'll talk through the safe storage requirements for lithium-ion batteries that manage the risks to keep people and facilities safe. The UK doesn't have specific regulations or legislation for the general storage of lithium-ion batteries.

What temperature should a battery be used at?

Temperature control: Batteries can be used at temperatures between -20C to 60C, but it's important to avoid reaching temperatures at the end of those ranges. Ventilation systems: Disperse hot air and keep closed to prevent fumes in case of a fire.

Can you store lithium ion batteries in the UK?

The UK doesn't have specific regulations or legislation for the general storage of lithium-ion batteries. The Health and Safety Executive has, however, published guidance on good practices for handling and storing batteries, even though it is not compulsory. Regulations are not prescriptive but instead follow the typical routes:

How much charge should a lithium battery have?

It's recommended to store lithium batteries: with a charge between 40-60% (fully charged or depleted batteries are more unstable). Depending on the type, capacity and volume of lithium batteries stored you may also need to consider: procedures to be taken in the event of an emergency, including liaison with emergency services.

In light of the growing risks from e-bikes and scooters in the workplace, we have published an introductory guide for employers on managing lithium-ion (Li-ion) batteries. This covers everything from charging and storage to internal policies ...
