

Rooftop rental site for solar energy installation

The most appealing aspect of renting your roof for solar panels is the financial benefit. Solar developers who offer these rentals typically handle the installation, maintenance, and repair costs of the solar panels at no upfront cost to the property owner.

Fixed roof rentals have become a favoured choice for the owners of commercial shopping centres and strip malls, as a long-term roof rental agreement monetises their previously unused roof space. The solar services provider pays a fixed monthly payment to the property owner for the use of the building's roof space, which also produces solar energy for the property.

Renters and landlords can use the SunSPOT solar system calculator to see how rooftop solar may perform on a property. This is a good starting point for any conversation. Try the SunSPOT calculator. If the landlord owns the premises ...

A rooftop rental agreement is a possible mechanism that can be used to maximise landlord solar installation and the purchase of renewable electricity by tenants in the retail sector.
