

Should I integrate solar panels into my roof?

Integrating solar panels into the roof brings both aesthetic and practical advantages: Click [HERE](#) for our guide to Integrated solar panels, which highlights the issues to consider when designing your roof and comparing integrated solar panels with panels on rails over the top of the tiles.

Are integrated solar panels better than on-roof solar panels?

Whereas on-roof solar panels are known to be an eye sore, integrated solar panels are the modern-day solution. As the Solar panels sit in-roof, they appear more streamlined and blend in more seamlessly, making integrated solar panels the more attractive option. Furthermore, In-roof Solar Panels can even be retrofitted to modernise your home.

What are roof-integrated solar panels?

The majority of roof-integrated solar panels on the market are pre-framed and available in one orientation. The GB-Sol system uses a hidden rail system which is fitted to the roof battens, and this can be designed for any shape or size of solar panel.

Are roof-integrated solar panels a good investment?

Roof-integrated solar panels in the UK are quite the initial investment, yet they can lead to substantial savings in the long run. Based on your property size and the solar panel size, in-roof solar panels in the UK can save you between £440 and £1,005 a year.

What are integrated solar panels?

In essence, integrated solar panels are the same as traditional solar panels. They absorb sunlight and convert it into usable electricity for your home. The difference is that instead of being mounted on top of your roof, they are built into its structure. This is done by replacing a section of your roof's materials with solar panels.

What is GB-Sol's integrated solar roof system?

GB-Sol's integrated solar roof system enables full-sized high efficiency solar panels to be discretely fitted within any type of conventional roofing material. The solar panels provide the waterproofing and so save on traditional roofing materials.
