

How much does a lithium ion battery cost?

Currently, 54% of the cell price comes from the cathode, 18% from the anode, and 28% from other components. The average price of lithium-ion battery cells dropped from \$290 per kilowatt-hour in 2014 to \$103 in 2023. In the coming months, prices are expected to drop further due to oversupply from China.

How have lithium-ion battery prices changed over the last 10 years?

Lithium prices, for example, have plummeted nearly 90% since the late 2022 peak, leading to mine closures and impacting the price of lithium-ion batteries used in EVs. This graphic uses exclusive data from our partner Benchmark Mineral Intelligence to show the evolution of lithium-ion battery prices over the last 10 years.

Why are battery metal prices so low?

Battery metal prices have struggled as a surge in new production overwhelmed demand, coinciding with a slowdown in electric vehicle adoption. Lithium prices, for example, have plummeted nearly 90% since the late 2022 peak, leading to mine closures and impacting the price of lithium-ion batteries used in EVs.

How much does a lithium ion battery cost in 2024?

The global average price of lithium-ion battery packs has fallen by 20% year-on-year to USD 115 (EUR 109) per kWh in 2024, marking the steepest decline since 2017, according to BloombergNEF's annual battery price survey, unveiled on Tuesday. Will a drop in green metal prices push electric vehicle battery prices lower?

Technology advances that have allowed electric vehicle battery makers to increase energy density, combined with a drop in green metal prices, will push battery prices lower than previously expected, according to Goldman Sachs Research.

Will lithium-ion battery prices decline in 2025?

BNEF forecasts pack prices to decline by USD 3 per kWh in 2025. (USD 1 = EUR 0.950) The global average price of lithium-ion battery packs has fallen by 20% year-on-year to USD 115 (EUR 109) per kWh in 2024, marking the steepest decline since 2017, according to BloombergNEF's annual battery price survey, unveiled on Tuesday.

Lithium-ion battery prices have fallen 20% to US\$115 per kWh this year, going below US\$100 for electric vehicles (EVs), BloombergNEF said.
