The size and weight of the battery are important factors to consider, as well as the number of plates and the amount of lead used in the battery. For example, a sealed lead-acid battery will typically be smaller and lighter than a flooded lead-acid battery, due to the absence of excess electrolyte.

4. Battery System Installation Considerations: No fire, flame or heat supply should be near the battery; Avoid installation near heat supply or in direct sunlight; Avoid operating in humid / damp locations; Do not operate in sealed enclosed or without ventilation. Temperature Range. UL94-HB Standard Jars. UL94-V0 Flame Retardant Jars
