

How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

Can solar panels be installed in portrait or landscape orientation?

Solar panels can be installed in either portrait or landscape orientation. For simple installation of the panels there is a full suite of flashing kits which can be used to create multiple combinations of panel arrays. The industry leading 5mm panel spacing and hidden fixings give a high-end clean finish.

How do I connect my solar system to the grid?

If your solar system is grid-tied, it will need to be connected to the local utility grid. This step involves: - Net metering setup : Many utility companies offer net metering, which allows you to send excess energy back to the grid and receive credits toward your energy bills. Your installer will set up the appropriate meters for this.

How does a solar panel installation work?

Mounting the panels: The installers will begin by securing mounting brackets to your roof or the ground (if it's a ground-mounted system). The panels will then be securely attached to these mounts. - Electrical wiring : After the panels are mounted, the electrical wiring will be connected to the inverter and electrical panel in your home.

How to connect a solar inverter to the grid?

In order to connect the inverter to the grid simply plug it in in the main power switch board, so that it gets power from the grid. The output wire is also connected with board that is supplying electricity in home. In order to calculate the excess energy generated from the solar system we need to install a metering device.

How do I connect my solar panels?

The solar panels come supplied with male and female MC4 connectors, so that they can be easily connected to each other. But you obviously need to add a male and female MC4 to the DC extension cables at each of the string. For this, you need a crimping tool. I bought this one from Amazon...
