

Should you invest in solar street lights?

We have the solution: off-the-grid street lighting. By investing in solar street lights with Sun-Lite Solar, you can cut all ties to the National Grid. Instead, you can generate, store and deliver your own renewable energy. What's more, if your solar panels produce excess energy on a particularly sunny day, this will be stored inside the batteries.

What is solar street lighting?

Solar street lighting is an excellent solution for temporary or essential works lighting. Solar lights, using redeployable solutions such as the below concrete blocks, can be installed quickly without the need for a mains connection, providing immediate illumination. This flexibility is beneficial for essential work or emergency repairs.

Are solar street lights a good choice?

Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting. Also, unlike traditional lighting, LEDs emit almost no heat, making them safer to change and more energy efficient.

Is solar street lighting a viable solution in the UK?

Solar street lighting is becoming an increasingly attractive and sought-after solution in the UK.

Are solar street lights energy independent?

Become energy independent today with Sun-Lite. Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting.

Can solar street lights be used on a road?

In addition, solar-powered road lighting is immune to power cuts. The road will remain well-lit even if the primary grid fails. Your solar street lights will store energy internally and light up the road for travellers through every season. We can also install temporary solar lighting for use on more minor roads.
