

Solar panels will be exported to San Diego this year

Are Solar Exports based on retail rates?

Under most net metering policies, including NEM 2.0, solar owners are credited for the full retail value of each kWh of electricity they put on the grid. However, under the NEM 3.0, the value of solar exports is no longer based on retail rates. Export prices are based on the "Avoided Cost Calculator" and vary by month, day, and hour.

Is home solar still worth it in California?

There are several advantages to pairing solar and battery in California, so being able to add energy storage later and remain in NEM 2.0 is a big win for Californians. Now that NEM 3.0 is in effect, many Californians are wondering if home solar is still worthwhile.

How will NEM change the value of solar energy?

The first and most critical point is the changing rate structure that will reduce the value of solar energy. The biggest change from NEM 2.0 to NEM 3.0 is the rates at which solar owners are compensated for the excess electricity they put on the grid (known as export rates).

What is the San Diego solar equity program?

The San Diego Solar Equity Program offers monetary assistance to income-qualifying, single-family homeowners in the City of San Diego to offset the cost of solar panel installation. To be eligible for the solar incentive, a customer must meet all of the eligibility requirements.

When will my account transition to the solar billing plan?

Virtual Net Energy Metering and NEM Aggregation customers who submit an interconnection application after February 14, 2024, your account will transition to the Solar Billing Plan in early 2025. What is the Solar Billing Plan?

When will my NEM account transition to the solar billing plan?

Harness the power of the sun, reduce your carbon footprint and save on your energy bill. NEM 1.0 and NEM 2.0 customers, when your 20-year legacy period ends, your account will transition to the Solar Billing Plan. You will be notified by email and in My Energy Center before your account transitions.

The San Diego Solar Equity Program (SDSEP) is a 10-year incentive program funded by San Diego Gas & Electric (SDG&E) shareholder funds as part of the City of San Diego's franchise agreement with SDG&E. The program allocates a total of \$10 million, \$1 million per year, to assist eligible customers with monetary assistance to install solar panels on their homes.
