

When will large scale solar southern Europe return to Greece?

We were delighted to return to Greece in September 2025 for our 3rd Large Scale Solar Summit! With a detailed programme designed around senior players from the most active Developers, EPCs, Banks and Funds in the region, Large Scale Solar Southern Europe will bring together countries including Greece, Turkey, Croatia, and Italy all under one roof.

How will a solar power plant work in Spain?

The plant will utilise surplus solar energy to pump water, ensuring a 100% clean process. Construction will begin in 2025, creating around 3,000 jobs over six years. This project emphasises Spain's commitment to renewable energy and reducing dependence on fossil fuels.

How does the Netherlands support energy storage?

The Netherlands have implemented a progressive regulatory regime supporting energy storage systems. The country fosters investments through subsidy programs for innovative storage technologies and adjustments to grid fees concerning storage facilities.

When is the Energy Storage Summit 2024?

Energy-Storage.news' publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 21-22 February 2024. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.

How many energy storage projects are there in California?

Several 8-hour projects in California, US, have gone ahead. The announcement said the five projects totalled 3,787 MWh of energy storage capacity, implying over 9 hours of duration, but a spokesperson for Matrix told Energy-Storage.news the correct figure was 3,280 MWh.

Is France a good place to invest in energy storage?

France has also set targets for energy storage capacity by 2028, fostering investments in BESS. While the revenue potential has been positively impacted by recent policies, the overall market for energy storage remains less developed and mature if compared to other EU countries. It is developing however, particularly in large-scale BESS.

The Energy Storage Awards 2024 saw the European industry celebrate the best technologies, brightest minds and sharpest business ideas. ... owner and operator of utility-scale BESS assets Harmony Energy took home ...
