

Are solar farm developments a tax issue?

In this article, Nicola Parkinson and Kathryn Brook, specialist lawyers from Walker Morris' Tax and Infrastructure & Energy teams respectively, highlight potential tax issues associated with solar farm developments.

How much tax do solar panels save?

Your tax saving by investing in solar is £22,800.00! As a rough rule of thumb, the tax saving is roughly equivalent to 1 year of benefits of your solar array. How does the 50% tax break for solar panels work?

What are capital allowances on solar panels?

Capital allowances on solar panels are tax deductions that businesses can claim on the cost of installing solar panels in commercial properties. The UK government offers tax relief in the form of capital allowances to encourage businesses to invest in renewable energy and reduce their carbon footprint.

Is a generation tariff liable for income tax?

A generation tariff received in a private capacity, which is not chargeable as miscellaneous income, will not be liable to Income Tax but the reduced cost of electricity should be reflected in the cost of electricity attributed to business use. An export tariff is payable for electricity exported to the wider energy market.

Do I have to pay income tax if I generate electricity?

Where the generation tariff is received by an individual, other than in a business capacity, and it is not chargeable as miscellaneous income, no Income Tax liability will arise. This will usually be the case where an individual generates electricity mainly for use in their own home.

What is a generation tariff?

A generation tariff is payable by reference to the electricity generated. The tax treatment of the tariff for Income Tax and Corporation Tax purposes will depend on the nature of the receipt in the hands of the recipient. In general where the receipt is received in a business capacity it will be a business receipt on normal principles.

In addition, a comparison is made between solar thermal power plants and PV power generation plants. Based on published studies, PV-based systems are more suitable for ...
