

# The easiest way to make solar panels video

How do you build a solar panel?

To build your own solar panel, you'll need to assemble the pieces, connect the cells, build a panel box, wire the panels, seal the box, and then finally mount your completed solar panel. Purchase the cells. There are a few different types of solar cells to buy, and most good options are either made in the United States, China, or Japan.

Can I build my own solar panel?

Solar cells are available from a range of suppliers all over the world and can be easily assembled into your own custom built solar panel. The nice thing about building your own solar panel is that you can make it to suite your needs. Solar cells are typically available in 0.5V and a range of power outputs.

How do you install a solar panel?

1. Purchase solar panel components, including solar cells, tab wires and encapsulation material (like glass). 2. Put on gloves and safety goggles. 3. Measure, stretch and cut the tab wires. 4. Solder tab wires to the front and back of the solar cells to create strings. 5. Test the connections with a multimeter. 6.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solaris particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renology, Select Solar and Sunstore Solar are also well worth a browse.

How do you connect a solar panel to a box?

Attach the solar unit to the box. Glue the solar unit to the completed box. Make sure that it is secure and that the cells are facing up and can get sunlight. There should also be two holes in the panel for the ends of the bus wire to go through. Connect the final bus wire to a diode.

How do I connect solar cells?

To connect those strings of solar cells, I used what is called a bus wire. The bus wire goes at the end of the strings to create one long string, however, curled up in a way like a snake. Again, for step 2, I recommend you watch the full video (Part 3) to understand how to work with the solar cells and how to check the voltage/current.
