Are Puget Sound and Portland General Electric pursuing battery energy storage proposals?

Puget Sound Energy and Portland General Electric have pointedly solicited battery energy storage proposalsin the last couple years. The first utility-scale battery storage systems in the Northwest were co-located with solar and wind farms.

What is the Goldendale energy storage project?

The project would infuse \$2B+ dollars into rural Washington and generate millions of dollars in annual taxes for Klickitat County to fund schools, police and fire departments, roads, playgrounds, libraries and other infrastructure. Learn More Our number one priority is the safe construction and operation of the Goldendale Energy Storage Project.

Why do we need a battery energy storage system?

"Battery energy storage systems help us to meet Washington's clean energy goals," said PSE spokeswoman Melanie Coon via email. "They are critical to maintaining grid reliability when demand surges during summer heat waves and cold snaps.

Did Oregon's first battery energy storage project require a public hearing?

Oregon's first standalone,large-scale battery energy storage projects in Troutdale,Hillsboro and North Portland were permitted by city planning departments, who in some cases did not even require a public hearing.

Will there be more battery storage projects in 2025?

Energy developers have proposed dozens more projects to follow in 2025 to 2027 from near the Canadian border in Whatcom County to the outer suburbs of Portland. Transmission planners at Puget Sound Energy alone have 15 to 20 interconnection requests for major battery storage projects in their queue for evaluation.

Are utility-scale battery storage systems causing long-distance transmission bottlenecks?

The first utility-scale battery storage systems in the Northwest were co-located with solar and wind farms. That is less controversial and is continuing, but exposes the utilities to long-distance transmission bottlenecks.

CEI created the Washington Clean Energy Testbeds to accelerate the development, scale-up, and adoption of new technologies in solar harvesting, energy storage, and systems ...

As of January 2025, the average storage system cost in Washington is \$1397/kWh. Given a storage system size of 13 kWh, an average storage installation in Washington ranges in cost from \$15,438 to \$20,886, with the average gross price for storage ...

Renewable energy storage system means batery storage or batery energy storage system that can store renewable energy when production exceeds demand and release energy when energy demand increases
