How does it work: The maximum power of 65W input will be achieved when the voltage is $\geq 20V$ with a minimum current of 3.25A. When the voltage is lower than 20V, the power will be maximized step by step. When a solar panel can supply a maximum of 18V, the maximum power will be 55W. When a panel can supply 15V, the power will be 45W, etc.

You can order accessories for your solar panels, portable power stations, charge controllers and more at Solar Power Supply.

You can order the Anker SOLIX C300 AC Portable Power Station at Solar Power Supply A complete
