How do I know if my iPhone has a battery?

The iPhone battery icons discussed in this article can appear in the top right corner of the screen and, in some cases, on the lock screen. Wherever you see the icon, the colors mean the same thing. You'll see a red battery icon on your iPhone if it's been a while since you last charged your iPhone.

What does the battery icon on my iPhone mean?

It means your iPhone's battery is charging. If you see the icon with a little lightning bolt next to it or in it, you know your iPhone is plugged into power. In some more recent versions of the iOS, the battery icon is white, rather than black or any of the other colors mentioned here.

How do I know if my iPhone battery is low?

When the red battery icon appears on the lock screen, that means your iPhone battery is so low that the phone can't even turn on. Plug your iPhone into a power source right away to start charging the battery. After a few minutes, it will have enough power to turn on again. You'll just see the red battery icon in the top right corner at this point.

Why is my Surface Pro 7 displaying a battery icon?

Thank you for reaching Microsoft Community and sorry to hear about the issue that you are having on your Surface Pro 7. Regarding with the issue on the battery icon displaying on the screen, yes, it is possible that this could be a hardware failure already on the battery of the device but kindly try doing these steps below first to troubleshoot:

Why is my iPhone showing a red battery icon?

You'll see a red battery icon on your iPhone if it's been a while since you last charged your iPhone. When you see this, your iPhone is telling you that its battery is low and needs to be recharged. If your iPhone is showing the red battery icon in the top right corner, it needs a charge, but still has enough power to work.

If you've ever wondered what the iPhone symbols on top of the screen (in the status bar) or in the iOS Control Center are trying to tell you, then you've come to the ...

Can someone please explain what is the purpose of this Screen On / Screen Off info in the Battery section? It totally doesn't make any sense.

**Battery Percentage Increase:** You should see the battery percentage rise on the screen indicating that power is being added to your device. **Charging Sound or Vibration:** Depending on your settings, you may hear a sound or feel a vibration when you connect your iPhone to power.

That normally means it's charging. If it's just a black screen with a battery and the lightning bolt, that normally means the battery is completely dead and it's charging back up enough to power on. I would bring it to Apple if you can and ...
