

What is the phone number of Windhoek energy storage power supply manufacturer

How many Van Eck power stations are there in South Africa?

The first two Units were commissioned in 1972, the third in 1973 and the fourth in 1979. Van Eck was the first Power Station to implement the dry cooling method in Southern Africa (Fans forcing air through radiators cool the Steam.) There is only one more Power Station in Southern Africa that uses this method of cooling.

Where did NamPower (swawek) start?

NamPower (SWAWEK) actually started at VAN ECK POWER STATION. When it was built in the early seventies the first power was distributed from this Power Station and all distribution lines were connected to the 66 and 220 kV High Voltage Yards.

Why do we offer innovative products & services in Namibia?

Innovative products and services are offered to provide a long-term reliable and sustainable solution in Namibia's harsh weather and geographical condition.

Are water tanks transforming Namibia's water infrastructure?

In a recent article, the Economics highlights the vital role of water tanks in transforming Namibia's water infrastructure for business and industry. It emphasizes the significance of reliable water storage for sustainable development and economic growth, with Abeco Tanks as a leading provider in this domain.

How does a power station work in southern Africa?

There is only one more Power Station in Southern Africa that uses this method of cooling. How does the power station work? Coal is fed into the Boiler by means of coal feeders which spray the coal onto the grate (Moving Floor) which moves forward at a set speed.

What services do we provide in Namibia?

We supply generators, INVT UPS applications and general electricity backup solutions to all sectors of the economy in Namibia. We cater for various bulk water storage applications to all sectors in the economy. We specialize in sectional steel tanks - either ground level or elevated.
