

Where can I buy a cheap and good battery pack

I've removed the label on the battery and can see there is two rows of 3 cells. There is also room for two more cells on the side where the terminals are. I have also looked at the manual and under "Power subsystem" it states "71 W 8-cell or 59.2 W 8-cell Li-ion battery pack". So they shipped it with a 6 cell battery but advise 8 cell in the ...

Typically it's part of the battery pack. A good BMS will disconnect the pack when any cell group is below or above a certain voltage, exceeds a certain peak current, or when some cells are above or below ideal temperature. They also serve to balance the pack, by bleeding power from cell groups whose voltage is above the others.
