

What is a solar charger & how does it work?

Solar chargers - These take the same basic idea of a solar generator but shrink the solar panel array to make it more portable. They charge your devices directly or through a separate USB power bank.

Which solar charger should I buy?

The Goal Zero nomad 2 has everything you might need in a solar charger: high wattage, an abundance of USB ports and a business-like folding design and the leading monocrystalline panel type. For mains-style power output on demand, the Ecoflow portable power station and 220W panel is highly recommended.

Can a solar panel charge a battery?

These chargers are usually designed to be used more like a portable battery pack and less like a solar panel because the solar panel often isn't big enough to reliably generate a lot of power from the sun. The panel will work in a pinch, but it can be slow to charge the integrated battery.

What is a portable solar charger used for?

Portable solar chargers are best used to power small electrical items, such as smartphones and portable battery packs. They can be perfect for topping up the batteries of devices you might take on a camping trip, but generally aren't much help when it comes to feeding more power-hungry products, such as televisions, portable fridges and kettles.

How much does a portable solar charger cost?

Specifically for this buyer's guide, we conducted online research and identified over a dozen portable solar chargers ranging in price from \$30 to \$649. After careful consideration, we narrowed down the candidates to a handful that we tested in real-world conditions.

Should you buy a portable solar battery charger?

A portable solar battery charger is a great option if you're taking an extended camping trip or traveling somewhere with an unreliable power grid, as it'll allow you to charge a phone the size of an iPhone 15 using just a few hours of midday sun.
