

Where to import lithium batteries from Conakry

Can I ship lithium batteries by air?

If you're planning to ship lithium batteries by air then you'd need to ensure that they're manufactured to the standards set by the latest IATA DGR. Your supplier must provide you or your forwarding agent with a UN.38.3 or UN Transportation Testing (UN /DOT 38.3) for every product manufactured or sold by them.

Are lithium batteries safe to import into the UK?

But it's likely that lithium batteries will appear in a large selection of the products imported into the UK and until safer battery options are developed, importers must comply with the regulations in place to ensure the safety of ships, lorries, aircraft and the people charged with bringing them to the UK.

How do I ship a lithium hydride battery?

Choose a strong, double-walled box or container to hold all the contents securely. Seal the outer box with plenty of strong tape, and attach the correct shipping label clearly to the outside. For dry and nickel-metal hydride batteries, this will typically be a standard shipping label.

What documents do I need to ship a lithium battery?

Some companies will also request a shipper's declaration for Section II lithium batteries, a statement signed by your supplier describing the contents of the shipment, the classifications, the complete contact information of the supplier, as well as the consignee's.

Are lithium batteries safe to ship?

Improperly packaged lithium batteries can ignite, causing fires that are difficult to extinguish and pose a significant risk to the safety of transportation workers and the general public. Other battery types, such as alkaline or nickel-metal hydride (NiMH), are generally considered safer to ship.

What types of batteries can I mail or ship internationally?

There are many types of batteries that have different requirements when you wish to mail or ship them internationally: Wet batteries, also known as flooded lead-acid batteries, are commonly found in vehicles and backup power systems.
