

## Won the bid for the largest sodium-ion energy storage battery project in China

Where is China's 10 MWh sodium-ion battery storage station located?

The 10-MWh sodium-ion battery storage station was put into operation on May 11 in Nanning, Guangxi in southwestern China. China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, said on May 11.

What is Datang Hubei sodium ion new energy storage power station?

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost converters. It uses 185 ampere-hour large-capacity sodium-ion batteries supplied by China's HiNa Battery Technology and is equipped with a 110 kV transformer station.

Why is China investing so much on sodium ion technology?

has been told anecdotally that one reason China is investing so heavily on sodium-ion technology is because of fears that, long-term, it could start to be cut out of the lithium supply chain.

Are sodium-ion batteries a new possibility for future power grid development?

Chinese media reported that the project in Qianjiang, Hubei province, shows that sodium-ion batteries have become a new possibility for future power grid development. Sineng Electric said that sodium-ion batteries show superior performance at low temperatures, better round-trip efficiency, and better overall safety.

What kind of batteries does China's Bess project use?

It uses 185 ampere-hour large-capacity sodium-ion batteries supplied by China's HiNa Battery Technology and is equipped with a 110 kV transformer station. Previously, the largest operational sodium-ion system was China Southern Power Grid's Fulin 10 MWh BESS project, located in Nanning, southwestern China.

Where is a 100 MWh energy storage station in China?

(A 100 MWh-scale energy storage station using sodium-ion batteries went into operation on June 30, 2024 in Hubei, central China. Image credit: Hina Battery) China has seen another energy storage project using sodium-ion batteries go into operation, as the new batteries begin to gain wider use in energy storage.

By 2025, sodium-ion batteries adopting the technological path of layered oxide will likely cost 83 percent of lithium iron phosphate batteries, the general manager of Chinese new energy and battery giant BYD's energy ...

In this project, BYD (Build Your Dreams) and Nachuang New Energy jointly won the bid. The indicators include: NFPP specific capacity ranging from 92 to 115mAh/g, with a ...

## Won the bid for the largest sodium-ion energy storage battery project in China

The first part of the world's largest sodium-ion battery energy storage system (BESS) has been launched in China. State media Yicai Global and technology provider HiNa Battery reported last week that the 50MW, 100MWh section of the project in Qianjiang, Hubei province, has been completed and is now operational.

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost converters. It uses 185 ...

""World-first"" grid-scale sodium-ion battery project in China enters commercial operation . It is located in Qingdao North Coast Data Center (QNCDC), in the northeastern town, though the announcement contained some ambiguity over whether the project is being launched or has already been brought online.

WUXI, China, Aug. 21, 2024 /PRNewswire/ -- Sineng Electric is spearheading innovation in the energy storage sector and has been chosen to provide its string PCS MV turnkey stations for the world's largest sodium-ion battery energy storage system (BESS). The initial 50MW/100MWh phase of this ambitious 100MW/200MWh project in Hubei Province, China, has been ...

Sineng Electric is at the forefront of energy storage innovation, supplying its cutting-edge solutions for the world's largest Sodium-ion Battery energy storage project. This endeavor represents a leap in sustainable energy technology. Unveiling the Advanced Energy Storage System. Sineng Electric's involvement in this monumental project highlights its ...

China's first large-capacity sodium-ion battery energy storage station was put into operation on Saturday, marking a milestone in the large-scale application...

Natron Energy Plans \$1.4B Sodium-ion Battery Plant in North Carolina; Sodium-Ion Batteries: The Future of Cost-Effective Energy Storage; U.S. Sodium-Ion Battery Plant Hits 50,000 Cycle Breakthrough; Sineng ...

The administration said that 22.6GW was deployed in the past year alone, with lithium-ion BESS technology making up 97.4% of new capacity additions. Read all our coverage of developments in the sodium-ion battery ...

Its capacity will eventually be doubled to 100MW/200MWh, but is almost certain to already be the largest sodium-ion project in the world, as claimed in both announcements. It comprises 42 BESS containers containing 185Ah sodium-ion batteries, 21 power conversion system (PCS) units and a 110kV booster station. As Energy-Storage.news reported when ...
